

## GOSOSY MENTAL HEALTH LESSONS ELECTRONIC ENHANCEMENTS

### Lesson Script: Let's Talk About Depression

NOTE: This **Lesson Script** is for teacher use only. It is not intended for students because it contains the answers to the “Listening for New Information” activities. Instead of the **Lesson Scripts**, students may use the **Pocket Guides** for self study of vocabulary and key conversations in both English and Spanish. See the **Teacher Guide** for more information about how to use the electronic enhancements.

The following “Message to Students About Mental Health” is recorded in Spanish at the beginning of the lesson. Students should listen to this message before using this or any of the Mental Health audio lessons.

#### *A Message to Students About Mental Health\**

*It is just as important to take care of your mental health as it is to take care of your physical health. Physical health means you have a strong and healthy body, while mental health means that your mind and emotions are also healthy. People with good mental health can cope with the problems of everyday life.*

*There are many types of mental health conditions, such as anxiety disorders, depression, and addiction problems with drugs or alcohol. Sometimes a mental health condition becomes so serious that it becomes a mental illness.*

*It can be difficult to talk about mental health, and it can be hard to admit that you or someone you care about is having problems with mental health. However, there are many things that can help mental health conditions. Sometimes talking with a professional counselor can help, and sometimes medications prescribed by a doctor can help. If you or someone you care about is having problems with mental health, there is a phone number you can call for a free, confidential referral near you. The number is 1-800-662-4357. Someone will talk to you in Spanish and will connect you to help near where you live.*

#### Mensaje a los Estudiantes Acerca de la Salud Mental

Es tan importante cuidar de la salud mental cómo lo es el de cuidar de la salud física. Salud física significa que usted tiene un cuerpo fuerte y saludable, mientras que salud mental significa que su mente y sus emociones están en buen estado de salud. Las personas con buena salud mental pueden enfrentar fácilmente los problemas de la vida diaria.

Hay muchos tipos de condiciones de salud mental, como trastornos de ansiedad, depresión y problemas de adicción a drogas o alcohol. A veces una condición de salud mental se vuelve tan grave que se convierte en una enfermedad mental.

Puede ser difícil hablar sobre la salud mental, y puede ser difícil admitir que usted, o alguien a quien usted conoce tiene problemas de salud mental. Sin embargo, hay muchas cosas que pueden ayudar a las condiciones de salud mental. A veces hablar con un consejero profesional puede ayudar y algunas veces los medicamentos recetados por un médico también pueden ayudar. Si usted o alguien a quien conoce tiene problemas de salud mental, hay un número de teléfono al que puede llamar para obtener una referencia gratuita y confidencial cerca de donde vive. El número es 1-800-662-4357. Alguien le hablará en español y le conectará con quien le puede ayudar cerca de donde usted vive.
